Housekeeping

Final Project
12/11

Looking for:

- Covering the basics from class
- use PHP and MySQL successfully

Grading on:

- What does data look like?
- What do tables look like?
- How normalized is the data?
  - More than one big table!
  - Don't over normalize the tables!
  - Find the happy medium.
- How much thought did you give to the structure of the data?
- Did you collect enough data for this to be a worthwhile experience?
- SELECT statements
  - How we are retrieving data?
- Secure applications
  - Incorporate preg_replace with all queries and all user recieved data

Final Presentation 12/7

- ~15-20
  - closer to 15 min
- Everyone has to talk!!
- Include:
  - Intro
    - Topic and why
    - How was data developed?
    - Wins and losses
      - What worked and what didn't
      - How did you stretch yourself?
      - What you accomplished?

- Working demonstration of site
  - Walk class through app functioning the way that you say it should
  - 2-3 days before the presentation
    - do a code freeze
      - do not add or change anything
    - start practicing demo

- Need code done by the Monday following the presentation!!
  - list of tables
  - list of working PHP script
  - link to primary page
  - copy of presentation

No Class next week!!
11/23

The following week: 11/30

No meeting or me meeting with groups??

If meeting with groups: do you guys want to schedule a time with me sometime on that day or do you want to meet during class time?
